INTRODUCTION

This is the third complete edition of Volume II of the Export Commodity Classification which was introduced in 1961. It reflects extensive changes in the structure of the classification, and includes abbreviated class descriptions in French for the first time.

Volume II of the Export Commodity Classification is designed primarily for the use of the staffs concerned with the accuracy of Canada's export statistics. It lists in class order the descriptions of all export commodity classes as they appear in monthly and quarterly trade reports, and shows after each class description the "office rulings" on commodity descriptions not specifically mentioned in the commodity classes but frequently encountered on customs export documents. It therefore provides a useful guide to the probable main components of any export commodity class. Because it is a working document whose content is continually changing, it is printed in loose-leaf form to facilitate revisions to individual pages as required.

This volume makes no attempt to provide a complete list of the contents of each export commodity class. Such a list would be too unwieldy for daily use. Nor are the rulings it contains designed to be self-sufficient; each ruling must be read in the context of the full class description and notes contained in Volume I of the Export Commodity Classification (DBS Cat. No. 12-521). Finally, it is not designed to help users find the class in which particular commodities are included; that purpose is better served by Volume III of the Export Commodity Classification (DBS Cat. No. 12-523) which presents the same material arranged in alphabetic order.

All office rulings (including commodity class description) are kept on punch cards to aid in making revisions and in controlling their accuracy and adequacy. This volume has been printed from copy prepared by listing these punch cards, which has imposed certain important limitations on the phrasing, punctuation and format which are used. The most important limitation is that of length: all class descriptions and most rulings are confined to one descriptive line not exceeding 35 characters in length (including all blank spaces, but not including the class code or unit of quantity). Because of this limitation there is extensive use of abbreviations, and this volume must be read carefully if users are to avoid being misled by these abbreviations. When the meaning of a ruling could not be expressed in one line even with abbreviations, a second line of not more than 30 characters was added. In these cases the second descriptive line is identified by a 4-letter indentation.

This volume is divided into two sections. The first section or "preamble" is brief (2 pages) and contains a few items which provide:

- (a) general guides to the classification of broad categories of goods

(e.g.: MANGANESE COPPER IS A COPPER ALLOY.)

- (b) warnings against basing a commodity classification decision on a term known to apply to more than one class of commodity

(e.g.: AMBERLITE IS A GENERAL TRADE NAME..)

The items in the preamble do not show a class code; they are therefore arranged in alphabetic order.

The balance of this volume presents the export class descriptions and specific commodity rulings arranged in class (numeric) order, and by alphabetic order within each class. The first item shown for any class is the English class description the second the French class description used in monthly and quarterly trade reports, while additional items for any class are specific commodity rulings. These items have the following characteristics:

1. Class descriptions: these consist of one descriptive line of up to 35 characters, a unit of quantity (or a blank if the class does not record quantity), and a class code. They do not have leader dots, and are further identified by the symbol □ preceding the description. In many cases class descriptions are sufficiently specific to make rulings on these classes unnecessary, but in other cases rulings are required to indicate the main commodities falling within given classes.
2. Specific commodity rulings: these consist of a 35 character description (occasionally supplemented by a second descriptive line of up to 30 characters), a unit of quantity (or a dash if goods which would be governed by a specific ruling are recorded without a quantity), and a class code. Leader dots link the ruling and its unit of quantity. The specific commodity rulings account for the vast majority of items in this volume.

Note that some rulings to certain classes specify a unit of quantity, while other rulings to the same classes show a dash in the quantity column. This may occur whenever a class takes both complete units and parts of units; rulings on complete units will usually specify a quantity (commonly "number"), while "parts" rulings will show a dash because parts are recorded without quantities.

Some class descriptions are preceded by the symbol # instead of □ ; the same symbol # follows the class number for these class descriptions and for all rulings relating to these classes. Statistics on commodities so identified are not available except to employees of the Dominion Bureau of Statistics. In all available published records such classes are combined with the most appropriate general class within the same commodity group (e.g.: class 400-90# is included with 400-99, class 414-40# with 414-49, etc.).

This volume makes extensive use of abbreviations because of the need to limit most descriptions to 35 characters. Some are standard dictionary abbreviations, some are terms widely used in industry, and some have been tailored to the specific needs of this volume by such devices as the omission of vowels or the omission of terminal syllables. There is no complete list of the abbreviations used, more than one abbreviation may be used for the same word or phrase, and one abbreviation sometimes has two different meanings.

The following examples define some of the more common abbreviations and illustrate the lack of uniformity:

ACC) according	GR grade
ACCORD)			green
BL bleached	INDUS) industrial
BRD broad	INDUST)	
COMM commercial	KD knocked down
DERIV derivatives	MACH) machines
		MCH)	
ELEC electric	MACHY) machinery
	electrical	MCHY)	
EXC except	MAT materials
FAB fabrics	PDR powder
FIB fibre		powdered
FROZ)		PT) parts
FZ) frozen	PTS)	
		WOV woven
			broad woven

Units of Quantity: In preparing the export commodity classification, a systematic effort was made to select units of quantity which could readily be reported and which could be made uniform in export and import statistics. As far as possible uniform units of quantity are used in each group of the classification to facilitate mechanical methods of tabulation. Weight and number are the most commonly used units since one or both of these is normally available for any export shipment, but in some cases measures of volume, area or length are used to conform with prevailing industrial practice. Generally, weight is the most common measure of quantity in Sections II, III and IV of the classification, number in Sections I and V.

Producers and processors of canned foods have recommended that quantity statistics for these commodities should be in terms of "net weight", i.e. that the weight of all containers, including the cans, should be omitted and only the weight of the contents of the cans shown. This classification attempts to follow that recommendation.

Throughout the export commodity classification the term "canned" means preserved solely by being shut off from contact with air. It therefore includes all food preserved by hermetically sealed containers, whether these be made of metal, of glass or of other materials, and also food packed in plastic wrappings and preserved solely by sealing against penetration by air. It does not include frozen foods regardless of the use of hermetically sealed containers, since frozen foods are preserved primarily by being frozen rather than by being shut off from contact with air. Likewise foods wrapped and sealed in plastic materials but which must be kept under refrigeration are not included as "canned".

UNITS OF QUANTITY AND DEFINITIONS USED IN CANADIAN EXPORT STATISTICS

Bbl.	Volume in barrels, for petroleum: 35 Canadian gallons or 42 U.S. gallons.
Broad woven ...	More than 12 inches in width.
Bu.	Volume in bushels, for barley, 48 lb. for Indian corn (maize), 56 lb. for buckwheat, 48 lb. for oats, 34 lb. for rye, 56 lb. for wheat, 60 lb.
Canned	Preserved solely by being shut off from air.
Carat	Weight in carats.
Cord	Volume in cords.
Cwt.	Weight in hundredweights of 100 lb. each.
Cwt. N.	For canned foods, weight of contents of cans in hundred- weights of 100 lb. each, the weight of all containers and packing being excluded.
Doz.	Number in dozens.
Doz. Pr.) DZ. PR.)	Number of pairs in dozens.
Ft.	Length in linear feet.
Gal.	Volume in Canadian gallons (1 U.S. gal. = 0.83 Can. gal.).
Hardwood	Wood from broad-leaved trees.
Lb.	Weight in pounds.
Lb. N.	For canned foods, weight of contents of cans in pounds, the weight of all containers and packing being excluded.
M.	Number in thousands.
M. B. Ft.) M. B. F.)	Volume in thousand board feet.
M. Cu. Ft.) M. C. F.) ...	Volume in thousand cubic feet.
M. Kw. H.) M. KWH.) ...	Thousand kilowatt hours.

UNITS OF QUANTITY AND DEFINITIONS USED IN CANADIAN EXPORT STATISTICS
(concluded)

Narrow woven ..	Not more than 12 inches in width.
N. E. S.	Not elsewhere specified.
No.	Number.
Pair	Number of pairs.
P. Gal.....	Volume of alcoholic content in terms of Canadian gallons of the strength of proof (1 U.S. P. gal. = 0.74 Can. P. gal.).
Rf. Sq.	Area in roof squares.
Softwood	Wood from coniferous trees.
Sq. Ft.	Area in square feet.
Sq. Ft.) ¼" equiv.) SF1/4)	Volume in square feet of ¼" thickness, other thicknesses to be converted to the equivalent of ¼" thickness (e.g. 10,000 sq. ft. of 1/8" plywood = 5,000 sq. ft. of ¼" equivalent).
Ton	Weight in short tons of 2,000 lb. each: 1 long ton = 1.12 short tons or 2,240 lb. 1 metric ton = 1.1 short tons or 2,205 lb.
Tr. Oz.	Weight in troy ounces.
\$	In unit of quantity column: no quantity recorded.
*	Preceding ruling: ruling new or revised as of date appearing at top of page.
□	Summary class description card as used in monthly and quarterly trade reports.
#	Statistics on this class not available except to employees of DBS.

UNITS OF QUANTITY USED IN THE FRENCH CLASS DESCRIPTIONS

BOISS	Volume en boisseaux.
BRL	Volume en barils.
CARAT	Poids en carats.
C TOI	Superficie en carrés à toiture.
CORDE	Volume en cordes.
DOUZ	Nombre de douzaines.
D PRE	Nombre de douzaines de paires.
GALL	Volume en gallons canadiens.
GAL P	Volume du contenu alcoolisé en gallons canadiens de preuve.
LIV	Poids en livres.
LIV N	Poids du contenu en livres (récipients exclus).
M	Nombre en milliers.
M KWH	Milliers de kilowatts-heure.
M PCU	Volume en milliers de pieds cubes.
M P P	Volume en milliers de pieds planche.
NOMB	Nombre.
ON TR	Poids en onces troy.
PAIRE	Nombre de paires.
PC1/4	Volume en pieds carrés de 1/4 de pouce d'épaisseur.
PI	Longueur en pieds linéaires.
PI CA	Superficie en pieds carrés.
QTL	Nombre en quintal en poids de 100 livres.
QTL N	Poids du contenu en quintal de 100 livres (récipients exclus).
TONNE	Poids en tonnes courtes de 2,000 livres.
